For: Ofer Shoham - CEO

Ref: new coating technology.

Dear Mr. Shoham.

Regard the positive results, showing the efficiency of your anti-microbial coating technology. We wish to examine the option of coating the floor in R.T.E packaging department.

We recognize the potential of this technology helping us eliminating presents of hazard pathogens and prevent cross contamination in the endless struggle to maintain highest level of hygiens in this department.

I understand that this technology can be easily applied over the current floor and the regeneration process will be part of the daily cleaning process.

Please inform me when it will commercial and what will be the price of it.

Best regards
Yohai ben zikri
CTO of Milouff poultry integration .
